

Leadcore Fishing Lake Lanier

100 yards of leadcore line has 10 colors

Line sizes come in 12,15,18,27,36 and 45 # test.

Each color released in the water will sink approximately 3 feet

Do put some backing on your reel before loading it up with leadcore line.

30' of 17 to 20# Fluorocarbon leader should be used (Leader should be lighter than leadcore)

Lures used: 1-3 oz bucktails with trailers, Swim Baits, Large stick baits such as Cisco Kid

Trolling at idle speed (2.5 to 3 Mph)

Do not stop the boat when reeling in a fish unless someone clears the other lines out.

Do not attempt to fish over trees. Better if you troll the River Channel .

Do use your mapping software on GPS and follow contours carefully.

Use waypoints to create a trolling pattern.

Fishing into the wind will slow your boat which will make your line runner deeper. The opposite happens when fishing with the wind.

	1oz	1.5oz	2oz
5 colors	15'	17'	20'
6 colors	18'	21'	24'
7 colors	21'	24'	28'
8 colors	24'	28'	32'
9 colors	27'	31'	36'

**THIS CHART IS AN APPROXIMATION RUNNING AT 2.5 MPH WITH 27#
LEADCORE AND A 30' LEADER**

Places to fish in July/August:

**Browns Bridge to River Forks
Chestatee River markers 1 and 2
Chestatee Bay from 2SH to Marker 29
Two Mile 1 - 5
Six Mile 1-6
Mouths of Shoal, Baldridge, Young Deer
B Buoy to Marker 18
Saddle Dike - Shoal Creek**

***This is my personal research. Use it as a guide. Try it and expand it
with experimentation.**

**Don't call me if you hang the trees. It will happen. Pay closer
attention to your GPS.**
